

Building our houses on rock

John Sheridan (@johnlsheridan)

23 April 2013

“Therefore whosoever heareth these sayings of mine, and doeth them, I will liken him unto a wise man, which built his house upon a rock: And the rain descended, and the floods came, and the winds blew, and beat upon that house; and it fell not: for it was founded upon a rock. And every one that heareth these sayings of mine, and doeth them not, shall be likened unto a foolish man, which built his house upon the sand: And the rain descended, and the floods came, and the winds blew, and beat upon that house; and it fell: and great was the fall of it”

Community

From Wikipedia, the free encyclopedia

*For other uses, see **Community** (disambiguation).*

The term **community** has two distinct commutative meanings: 1) Community usually refers to a **social unit** larger than a small village that shares common values. The term can also refer to the **national community** or **international community**, and 2) in **biology**, a community is a group of interacting living organisms sharing a populated environment.

In human communities, **intent**, **belief**, **resources**, **preferences**, **needs**, **risks**, and a number of other conditions may be present and common, affecting the **identity** of the participants and their degree of cohesiveness.

Since the advent of the **Internet**, the concept of community has less geographical limitation, as people can now gather virtually in an online community and share common interests regardless of physical location. Prior to the internet, virtual communities (like social or academic organizations) were far more limited by the constraints of available communication and transportation technologies.

The word "community" is derived from the **Old French** *communité* which is derived from the **Latin** *communitas* (*cum*, "with/together" + *munus*, "gift"), a broad term for fellowship or organized society.^[1] Some examples of community service are to help in church, tutoring, hospitals, etc.

A community of interest gathers at Stonehenge, England, for the summer solstice.

The INSPIRE Regulations 2009

Made

Laid before Parliament

Coming into force

1st December 2009

7th December 2009

31st December 2009

The Secretary of State, who is designated for the purposes of section 2(2) of the European Communities Act 1972(1) in relation to the environment(2), makes the following Regulations in exercise of the powers conferred under section 2(2) of and paragraph 1A of Schedule 2(3) to the European Communities Act 1972.

All open data is good, but some is better than others. This tool gives you a certificate that will help people understand the open data you are publishing.

The questions here cover the areas that the Open Data Institute examines when we look at how organisations are publishing open data. They cannot be used to assess your compliance with either legislation or with other policies that may apply in your sector.

Help

Questions marked with a label must be answered to gain that level of the certificate. Click on question marks  or labels to find out more about what to enter.

★ Basic

This data satisfies the fundamental requirements for open data.

★ Pilot

This data satisfies the requirements for initial forays into publishing open data. It provides sufficient support to prompt some reuser experimentation with a data.

★ Standard

This data satisfies the requirements for routinely published open data that encourages reuse.

★ Exemplar

This data satisfies the requirements for key information infrastructure.

Questionnaire

What's a good title for this data? 

Where is the data described? 

★ Pilot

What's the name of the curating organisation? 

What's the website for the curating organisation?
